Summary

Dedicated Informatics student with strong expertise in PHP (Laravel) and modern JavaScript frameworks (Next.js, React). Proven track record in leading technical teams for campus events and maintaining organizational web platforms. A fast learner currently expanding technical proficiency into Yii framework to deliver robust and scalable web solutions.

Education

Universitas Multimedia Nusantara — Tangerang, Indonesia
Bachelor of Computer Science (Informatics) — *Expected 2028*

- Current GPA: 3.35 / 4.00
- Relevant Coursework: Intro to Internet Technology, Advanced Web Programming, Database System

Experience

Himpunan Mahasiswa Informatika (HMIF) — **Tangerang, Indonesia**
Head of Research and Development (R&D) Division — *Nov 2025 – Present*

- Lead a technical team of 5 staff to design and develop digital solutions enhancing the academic experience of Informatics students.
- Managed the product lifecycle of student-facing applications, from requirement gathering to deployment and maintenance.

R&D Division Member — *Nov 2024 – Nov 2025*

- Developed and maintained organizational web applications to support internal administrative needs.
- Conducted technical research to support project quality improvements and innovation strategies.

Informatics Laboratory — Apr 2025 – Apr 2026
Supervisor — *Tangerang, Indonesia*

- Managed leadership teams across Cyber Security, AI, and Digital Interaction labs; acted as the primary liaison with the Informatics Study Program.
- Oversaw administrative operations, including workflow management and drafting facility procurement requests to optimize lab infrastructure.

INFORTA 2026 — Jan 2026 – Present
Website Division Coordinator — *Tangerang, Indonesia*

- Architected and deployed the official event website and a real-time interactive quiz platform in under one month, using Express.js and Socket.io.
- Conducted comprehensive penetration testing and security audits to mitigate system vulnerabilities and ensure overall platform security.

Perkenalan Prodi Informatika (PPIF) — **Tangerang, Indonesia**
Website Division Coordinator — *Jan 2026 – Present*

- Coordinate the development of the official study program introduction website and a real-time quiz platform.
- Build the main website using Next.js (TSX) and develop a Kahoot-like quiz application using React, Express, and Socket.io.

Website Division Member — *Mar 2025 – Aug 2025*

- Collaborated in the front-end development of the official study program introduction website using Next.js.
- Ensured website responsiveness and cross-browser compatibility for a seamless UI/UX for new students.

Bringing Your Tech Experience (BYTE) — May 2025 – Nov 2025
Website Division Coordinator — *Tangerang, Indonesia*

- Led the web division in developing an event website using Laravel and real-time features with the Pusher library.
- Coordinated development timelines and task distribution to ensure on-time delivery for the event launch.

SMK STRADA (Internship Program) — Jul 2023 – Dec 2023
Web Developer Intern — *Jakarta, Indonesia*

- Developed a company profile web application with a custom CMS using the Laravel framework.
- Utilized Laravel's Eloquent ORM to manage database queries and optimize data storage in MySQL.

Projects

HMIF Official Website | *Laravel, MySQL* — Nov 2025 – Present

- Manage and maintain the organization's company profile website, ensuring all features are up-to-date.
- Regularly update content and optimize the Laravel-based backend to ensure site stability for student users.
